

# Acme Chemical Company

Chemistry For the 21<sup>st</sup> Century

Improving Production  
Efficiency & Sustainability

Kevin Maxwell, Production Manager

## 3 Goals of Acme Chemical

- Reduce inputs of chemical materials by 20%
- Implement latest technologies into the manufacturing process
- Reduce material costs, pollution and associated wastes.

A close-up photograph of a male scientist wearing safety goggles and a white lab coat. He is looking down at a rack of test tubes. The background is slightly blurred, showing other laboratory equipment and a person in a white lab coat.

## Research & Development

- The research and development department will be conducting research on utilizing chemicals that are sourced from biomass instead of petroleum sources, which are renewable and potentially better for the environment.

# Implementation of Better Technology

- Leaner manufacturing, that costs less, produces more, and creates less waste
- Train Technicians and Operators how to optimize the use of new technologies
- Maximize resource and labor inputs

# Environmental Safety & Pollution

## Control

- Increasing our monitoring and equipment of pollution and wastes
- Make sure HAZMAT policies are carried out correctly
- Ensure that all breaches in EPA standards are reported and shut down the effected equipment immediately until it is repaired and working properly.

# Meet & Exceed EPA Standards

- EPA guidelines and procedures will be introduced into daily routines

- Inspections will be held twice daily by the Environmental Safety and Pollution Dept.
- Departments will be subject to yearly bonuses for following procedure or disciplinary action if breaches occur

# Reducing Wastes

- Obtain higher yields from less resource inputs
- Re-use waste products if possible
- Treat waste to become more environmentally friendly
- Ensure wastes are disposed of properly

# Reinvest Savings

A 3D bar chart with six bars of increasing height, colored from red to green. A blue line graph is overlaid on the chart, showing an upward trend with some fluctuations. The bars are positioned on a light-colored tiled floor.

- Savings from leaner manufacturing will be reinvested in R&D to ensure Acme remains at the top of the chemical industry
